

3-STAGE BUSINESS TRAINING: WE BRING LEARNING TO YOU

OUR PERSONALIZED APPROACH TO BUSINESS DEVELOPMENT

ClaimTek's business training program includes 3-stages of one-on-one mentoring that integrates seamlessly with our marketing program to ensure licensee success. Continuous training and consultation on *all areas* of operating a medical billing business and different specialties have proven to be the most effective way for newcomers to learn this industry and become true professionals in a matter of weeks. Our modern remote training minimizes expenses and provides our expert guidance when you need it most. We offer real-world experience that will give you confidence to deliver industry leading service, so you can drive referrals and build a profitable business.

STAGE 1

During Stage 1, training is performed in private one-on-one sessions through an interactive online meeting. Each training session ranges from 1-2 hours. You will never be left alone to do it all yourself like basic online training courses. Your mentor will assign homework between sessions to ensure you fully grasp each topic, along with checkpoint quizzes and an exam.

Depending on which ClaimTek program you choose, you can receive up to 28 hours of focused one-on-one training which, in total, amounts to dozens of hours of training. Our "take you by the hand" approach is highly effective because we tailor it to you. The training is conducted with no interruptions or distractions from other people as so often happens in a large group training session. Your trainers will personally train you on

software, billing, marketing, and operations, including how to setup your office for maximum efficiency and HIPAA compliancy. Personal trainers are available from 8:00 AM to 7:00 PM Pacific Standard Time including weekends. You'll be trained on our Effective Marketing strategy and how to use every marketing item that comes with your package. Your trainer will conduct role playing sessions with you to help you customize your messaging to fit your personal style.

Stages 2 and 3 below are referred to as the "***Business Consulting, Training, and Coaching***" (BCTC) package, designed to give you excellent "on-the-job" training and peace of mind as you grow your business.

STAGE 2

ClaimTek refers to Stage 2 as "***Business Consulting & Personal Coaching.***" It includes pre-appointment training and post appointment consultation sessions. This stage will enhance your abilities to relay information and build your confidence while you conduct your marketing campaign. Whenever you have an upcoming appointment with a doctor, dentist, or any other medical specialty you simply contact ClaimTek prior to the appointment. We will prepare you for the meeting and help you learn about any specific billing rules that might apply for that specialty. You'll also learn about the types of questions to expect during your presentation and what questions you should be prepared to ask them to pinpoint any operational issues within the practice. The goal here is for you to have a professional, interactive discussion with the doctor and office staff which, in turn, will raise your level of credibility and their interest in working with you. This stage also includes training on pricing strategies and contract proposals which is an important part of your initial meeting or follow-up appointment.

STAGE 3

“Refresher Training.” Once you have secured a client, call your trainer to refresh your memory of the billing and software features. In addition, you’ll be trained on specific billing aspects of the medical specialty you signed up as a client. We’ll help with sign-up procedures, assist in setting up your doctor’s database and clearinghouse account, and oversee the transmission of claims.

DON’T BE A SALESPERSON!

ClaimTek takes pride in our ability to train *anyone* to become a successful medical billing business owner. If you decide to get started with us, we guarantee that you'll be well-trained and well-positioned to take charge of your new business in the shortest time possible. We teach you to sell with science rather than gimmicks, so you present yourself professionally with factual financial analysis. You simply need to follow our blueprint for success by adding your consistent effort!
